

Emglo sold their name to DeWalt, but Jenny Products in PA purchased all the Emglo foundry equipment, most of their employees and continues to make the same Emglo parts to fit your old Emglo unit. They have even improved some of the original Emglo designs. The only difference is that your pump or new unit will have the Jenny name on it instead of the Emglo name due to DeWalt purchasing the name, "Emglo".
